1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

- 2. Claims 1, 2, 4, 6-9, 11-14, 16-19, 21, 22 and 25-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Gessaman. Gessaman discloses a body 20, a valve stem 40, a gate 38 that opens and closes the opening 42 and thereby performs the function of a gate as claimed, a valve stem seal 70, a sealed cavity 50 and 52, and opening 48 which passes within the interior wall of bonnet or body part 24 at 56. In regard to claim 8, Gessaman discloses a bonnet 24, a bonnet cap 26 and upper and lower seals 70 between the bonnet and cap and on the valve stem at the bottom of 50, between 50 and 52 and at the top of 52.
- 3. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gessaman in view of Steinke. Gessaman discloses a balanced valve substantially as claimed but does not disclose a filter in the balance opening. However, Steinke teaches another balanced valve having a filter 28 in the balance opening for the purpose of ensuring contaminants do not enter the sealed chamber. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the valve of Gessaman with a filter as, for example, taught by Steinke in order to keep contaminants out of the sealed chamber.
- 4. Applicant's arguments filed 6/17/2005 have been fully considered but they are not persuasive. Applicant contends that Gessaman does not disclose an opening formed in the bonnet. However, Applicant is ignoring element 56 which clearly is an opening formed directly in bonnet 24 as claimed. Note that the claim term "comprising"

Art Unit: 3751

merely defines what the claim includes but does not exclude additional elements being present. Passage 56 of Gessaman is an opening formed in the bonnet as claimed even though the air passage also passes through the valve head at 54. The claims merely call for an opening in the bonnet that fluidly communicates with the sealed cavity and the interior region of the body. Passage 56 does this as claimed with the fluid communication to the interior region being through the valve head. The claims do not exclude having the opening formed in both the bonnet and also the valve head.

5. Claims 5, 10, 15, 20 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 28-30 are allowed.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
